Transactions of the American Institute of Mining Engineers Volume 58 (Paperback)

By American Institute of Engineers

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1918 Excerpt: .the LaMotte sandstone and the lower portion of the Bonne Terre dolomite near the contact with the underlying pre-Cambrian formations. It assays from 1 to 2 per cent, cobalt and nickel and about 2 per cent, copper. In the Flat River-Bonne Terre area but little of this character of ore occurs, although the middling product of some of the tables separates mixed sulphides. Copper ore, chiefly carbonate, has been found in Shannon County at the contact of the pre-Cambrian and sedimentary rocks. In the Slater shaft west of Eminence, a small stringer of the ore has been followed to over 100 ft. in depth where the joint plain has been reduced to less than an inch between walls. In many cases the deposits of hematite in the filled sink area also show copper carbonate but in no instance has copper ore been produced on a commercial...

Reviews

This written ebook is excellent. It is amongst the most awesome ebook i have study. You will not truly feel monotony at whenever you want of the time (that's what catalogs are for regarding if you ask me).

-- **Devante Langworth IV**

This book will never be easy to start on looking at but quite entertaining to read. It is actually packed with wisdom and knowledge It is extremely difficult to leave it before concluding, once you begin to read the book.

-- **Ms. Missouri Satterfield DVM**
