The methods required are for the most part simple and well adapted for introduction into small local plants. For lack of time this report must pass by the numerous proposals made during the year for the utilization of other less promising fibers and fibrous wastes. Mention should, however, be made of Perini fiber (Canhamo brasiliensis, Perini), recently discovered by Dr. V. A. de Perini, of Rio de Janeiro, and now attracting considerable attention. In its essential features Perini resembles jute. Coming now to the narrower questions of detail in the chemical technology of paper making, we find that the year has been marked by no development of the first importance. Under an arrangement with the American Chemical Society your chemist and his assistants have abstracted all articles appearing...
