

# Materials for Electrochemical Energy Storage and Conversion II-Batteries, Capacitors and Fuel Cells: Volume 496 (Paperback)

Filesize: 2.62 MB

## Reviews

*This written pdf is great. It is really simplistic but surprises within the 50 percent of the pdf. I realized this pdf from my dad and i advised this pdf to understand.*  
*(Mr. Milford Jakubowski IV)*

To read **Materials for Electrochemical Energy Storage and Conversion II-Batteries, Capacitors and Fuel Cells: Volume 496 (Paperback)** PDF, you should refer to the button beneath and download the file or have access to other information that are relevant to MATERIALS FOR ELECTROCHEMICAL ENERGY STORAGE AND CONVERSION II-BATTERIES, CAPACITORS AND FUEL CELLS: VOLUME 496 (PAPERBACK) book.

CAMBRIDGE UNIVERSITY PRESS, United Kingdom, 2014. Paperback. Book Condition: New. 229 x 152 mm. Language: English Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Our energy-hungry world increasingly relies on new methods to store and convert energy for portable electronics, as well as environmentally friendly modes of transportation and electrical energy generation. The development of high-performance power sources are intimately linked to the availability of advanced materials. Designing batteries and capacitors with higher specific energy and power, longer cycle life and rapid charge/discharge rates requires a deeper understanding of the relationship between materials properties and performance. Fuel cells, which offer the potential for clean, efficient conversion of chemical energy to electrical energy, are hampered by high cost and performance problems which can be resolved by new materials and processing techniques. Advanced batteries such as lithium-ion and nickel-metal hydride offer the potential for improved performance if low-cost materials can be developed. This book shares research and highlights the importance of materials in energy conversion technologies. Topics include: rechargeable batteries; lithium-ion rechargeable batteries - modelling; fuel cells; lithium-ion rechargeable batteries - cathode materials; battery electrolytes, interfaces and passive films; lithium-ion rechargeable batteries - anode materials and supercapacitors.
